

Project 4: Data Visualization

Submission-ready dashboard and visual insight report

Total Revenue	Total Orders	Units Sold	Average Order Value
INR 1,264,761.96	1,200	3,535	INR 1,053.97

Executive Summary

This visualization project converts 1,200 order records into a clean dashboard and business-ready insight narrative. The analysis shows total revenue of INR 1,264,761.96, 3,535 units sold, and an average order value of INR 1,053.97. Chair is the top revenue-generating product, while 2024-06 is the strongest revenue month. The visuals were designed using simple chart types, direct titles, readable labels, and a one-message-per-chart approach.

Key Visual Findings

Finding Area	Business Observation
Revenue leader	Chair generated the highest revenue: INR 195,620.11 from 178 orders.
Peak month	2024-06 recorded the highest monthly revenue: INR 68,068.54.
Payment pattern	Credit Card contributed the highest payment-method revenue share at 20.86%.
Acquisition source	Instagram is the strongest referral source by revenue contribution at 21.77%.
Order status	Cancelled orders are 20.83% of total orders; monitor cancellation reasons to protect revenue.

Revenue Story: Trend and Product Contribution

The trend chart highlights revenue movement across months and identifies 2024-06 as the peak month. The product chart shows that Chair is the leading revenue contributor. These visuals support inventory and campaign prioritization.

Operations Story: Order Status and Payment Behavior

Order-status visualization helps track business leakage through cancellations and returns. Payment-method revenue shows Credit Card as the strongest payment channel, which should remain friction-free during checkout.

Acquisition and Basket Story

Referral-source revenue indicates that Instagram is the strongest acquisition source by revenue. The quantity vs total price scatter confirms that higher quantities generally lift order value, with high-price products creating visible spread.

Recommendations and Submission Notes

Priority	Recommended Action
Focus on top product	Prioritize stock, offers, and campaigns around Chair because it is the top revenue driver.
Replicate peak-month strategy	Review campaigns/pricing in 2024-06 and repeat the successful actions in upcoming months.
Optimize payment experience	Ensure smooth checkout for Credit Card users because it drives the highest revenue.
Improve acquisition ROI	Invest more in Instagram since it provides the strongest revenue contribution.
Reduce cancellations	Analyze cancelled/returned orders and improve delivery, product information, or support to reduce leakage.

Visualization Quality Checklist

- Used bar charts for category comparison, line chart for trend, and scatter plot for relationship analysis.
- Avoided chartjunk, 3D effects, heavy borders, and unnecessary decoration.
- Kept titles action-oriented and focused on the conclusion, not only the topic.
- Used direct data tables and dashboard visuals to support stakeholder-friendly storytelling.
- Prepared Excel workbook, PDF report, chart images, and README for direct submission.
